

RUSSELL CHARGE ACCESS

A RUSSELL SAFETY Product

RUSSELL CHARGE ACCESS is a safety solution, installed by dropping over the linercart rail. It provides easy access to the charge from the RUSSELL Mill Relining Machine (MRM) beam. The fixed or adjustable ladder configurations provide a welcome alternative to unsafe access methods. RUSSELL CHARGE ACCESS offers the ultimate in efficiency and performance when manoeuvrability and safety are essential.

BENEFITS

- Eliminates dangerous practices and improves reline safety
- Increases reline productivity and mill availability
- Easy to use, simply drops over the linercart rail
- Engineered as a safety solution for Ball, SAG and AG mills
- High-quality solution tailored to the mining environment
- Fulfils HSE compliance requirements as a proactive solution to mitigate risk

With ever-increasing health and safety requirements in the mining industry, we've created a mill charge access safety solution that mitigates risks and protects crews, plus it's really durable and easy to use.

John Russell

Founder and Executive Chairman, RUSSELL MINERAL EQUIPMENT

RME is the world's leading Original Equipment Manufacturer (OEM) of mill relining systems.

440+

Mine sites served by RME equipment and services

500+

Custom manufactured RUSSELL MRMs globally

FEATURES

- Strong, aluminium frame for easy manoeuvrability or handling
- Efficient drop-in design and secure attachment
- Light enough to be installed and removed by one person
- Expertly-engineered to withstand the mill environment
- Supplied with fixed length step ladder for use in Ball mills
- Supplied with adjustable length ladder for SAG and AG mills
- Handrails ensure user has three points of contact at all times
- Even-step platforms for extra stability and rungs for ease of use
- Prevent dangers of a 'lean-to' ladder perched on an uneven charge
- Engineering assessment determines the height of the RUSSELL MRM beam over the charge and the bracket configuration to best suit the liner cart rails

APPLICATIONS

- Compatible with existing RUSSELL MRMs for reliability and productivity
- Integrates with other RUSSELL SAFETY Products (RUSSELL Height Safety, RUSSELL RESCUE RAISE) to form a complete, integrated safety system

WE ARE RME

RME was born 35+ years ago with a strong resolve to address our Customers' challenges. Since then, the RME Mill Relining System has quartered our Customers' time-to-reline and eradicated a great many safety issues. This same pursuit is driving our development of RME INSIDEOUT Technology which helps Customers eliminate fatal risk by enabling relining from outside the mill.

Cherylyn Russell

Chief Customer Officer, RUSSELL MINERAL EQUIPMENT
