

**RUSSELL 7 S+**  
Mill Relining Machine

**RUSSELL 7 Model S+ Mill Relining Machine**

**All set for the automated future of mill relining**

Building on the success of the industry's most mature and deployed liner exchange solution, the **RUSSELL 7 Model S+ Mill Relining Machine** looks ahead to the future of automated relining.

The RUSSELL 7 Model S+ Mill Relining Machine combines everything the industry has come to know, value and trust about RME's signature machine with built-in hardware readiness for advanced relining.

RUSSELL 7 Model S+ Customers experience the best of both worlds – reliable liner exchange technology for superior relining safety and productivity today, as well as an easy, economical and future-proofed upgrade path to RME *AutoMotion*™ and relining from outside of the mill.

**440+**

Mine sites served by RME equipment and services.

**550+**

RUSSELL MRMs engineered, manufactured and delivered.

**860+**

THUNDERBOLT Recoilless Hammers sold.

## RUSSELL 7 MODEL S+ Mill Relining Machine

Our signature liner exchange machine now future-proofed.

Available in 4500 kg – 9000 kg capacities

### Powered liner cart slew

Efficient liner transport via remote control.

### All flat work platform and beam

Enter, traverse and exit the mill safely.

### Portable remote-control harness

Operate the MRM from better, safer vantages outside the mill.

### Guards and rails

Safe working at-height.

### Safer hydraulics and electrical safety.

Enhanced condition monitoring and ease of serviceability.

### Tie-downs with fail-safe interlock

Anchor your MRM securely ready for heavy-duty lifting.

### Ready for RME INSIDEOUT™ Technology

The RUSSELL S+ MRM is hardware-equipped for an easy upgrade path to full RME *AutoMotion*™. Now mine sites have the ability to progressively adopt RME INSIDEOUT™ Technology at their pace, maximizing the value of their technology investments today – all while readying them for the future of automated mill relining.

Reach out to RME to learn more.

### New coating technology

Better protection in harsh conditions.

### Industry-best safety technology

eStops, base drive enable systems, LED work and emergency lighting, boom lift limiting, grapple release safety and more.

### No-lift slide-in operator station

Eliminates manual lifting.

### New ergonomic chair

For optimum comfort during long shifts.

### Hardware equipped for RME *AutoMotion*™

Ready for faster and safer semi-automated relining from outside the mill.

### Smart vision-based technologies

Ready for faster, safer roboticised liner placement with millimetre-precision accuracy.

### Heavy-duty telescopic boom

Reach all mill working heights and extreme angles for high productivity.

### Low-backlash turntable

Stable and precise movement for robotic operations.

### Fast auto-deploy and retract

Smart push-button to robotically deploy for work or retract to store.

### New All-Reach Grapple™

Fast lifts, precise control and ready for automating mill relining.

### RUSSELL Claw™ ready

The new *master of muck-out* will grab knocked-in liners wherever they fall without manual slinging.

**Compatible with a wide range of grapple options and MRM accessories for boosting productivity and safety**

## **BENEFITS**

### Future-proofing safety

The RUSSELL 7 S+ MRM is making evolutionary strides in safety. The industry's most tried and trusted machine now features RME's innovative automation-ready platform, ready for removing operators out of harm's way and relining from outside of the mill.

### Consistently fast relines

Precision engineered to consistently achieve the liner exchange rates you need to make your shutdowns short, with built-in flexibility for advancing to RME *AutoMotion™* and securing even faster relining speeds.

### Trusted for reliability

The RUSSELL MRM has proven through time it can withstand harsh concentrator environments and perform reline after reline. The RUSSELL 7 S+ MRM affords you this same reliable performance and the foundation to add autonomous features later without a major upgrade of the machine.

### Superior service lifecycles

The unrivalled and fiercely robust RUSSELL 7 S+ MRM is better for the balance sheet because it is built to last. This lowers total cost of ownership over the life of higher performing, longer lasting equipment.

### Increased mill availability

RUSSELL 7 S+ MRM is field-proven to excel at relining in a wide range of grinding mill environments and future-proofed to unlock new opportunities to increase mill availability and mine site profitability.

### Comprehensive support

Supported by RME's Mill Relining Optimisation Program, RME 24/7/SERVICE and a collaborative systems engineering journey which leverages our 35+ year trusted evidence-based OEM expertise.

### Applications

Ideal for mine sites with medium to large SAG, AG and ball mills or long-life mines seeking to achieve sustainable step-change improvements in risk, safety and mill availability.

## Choose your RUSSELL 7

The RUSSELL 7 is the industry's most trusted and adopted mill relining machine. They embody everything RME has learnt over 35+ years and 550+ MRMs manufactured to deliver superior productivity, serviceability, safety and lower total cost of ownership.

And now, RME's modular systems engineering approach offers more models, for mills large, medium and small, so you are certain to find a solution to match your mine site needs.

It's never been easier to enter the world of advanced relining and achieve visible, defensible and sustainable improvements in concentrator performance and mill relining safety.

## Creating the future of mill relining

Mineral processors need to address issues that are more challenging and more urgent than ever.

On one hand they must reduce the risks that remain associated with hazardous mill relining. On the other, maximise mill availability for meeting the world's mineral needs.

It is this pursuit to improve safety and productivity that drives RME to innovate for our industry.

This has led us to envision a future where relining is performed with no one inside the mill at faster speeds than ever before.

And now this future is here.

## ADVANCE YOUR MILL RELINING – SAFELY

For almost 40 years, RME has led the world in the engineering of fast, reliable, safe technologies and processes for every step on the mill relining path.

Today the integrated RME Mill Relining System has advanced to incorporate autonomous capabilities.

At its centre is the RUSSELL MRM with an expanded range, a modular future-proofed platform and RME *AutoMotion*<sup>™</sup> optionality.

Supporting it, stands the industry-proven THUNDERBOLT worn liner removal solutions and innovative RME *INSIDEOUT*<sup>™</sup> Technology.

Together, they move operators out of harm's way and relining off the shutdown critical path.

Best of all, RME's carefully-staged systems engineering maximises current investments by enabling mine sites to adopt automation progressively at their pace, and as needs dictate.

RME's approach to mill relining automation prioritises safety at every step. First, we take mature and proven technologies and future-proof them with automated capabilities. Second, we take a systems approach to ensure no new risks are introduced inside and outside the mill. Third, we've developed a carefully staged and fully-supported implementation program which minimises technical and cultural change risks. Our approach is fast, reliable and ensures the safety of your reline crew.

**RUSSELL**  
MINERAL EQUIPMENT

# RME delivers innovation to the world

RUSSELL MINERAL EQUIPMENT (RME) is the global leader in the manufacture and supply of grinding mill relining technologies, services and support.

RME operates across 12 international Sales and Service Centres with a global reach of over 440 mine site locations.

RME's commitment to industry is to visibly, defensibly and sustainably improve our Customers' concentrator performance. We enable our Customers to remove fatal risk through innovative solutions.
